Murderbad

...

Are they actually trying to kill all the wild horses in America?

I keep seeing this and several conflicting reasons as to why they would be but I'm struggling to find a lot of mainstream information about it.

Wild horses are an invasive species in the US. They were introduced by Cortes and compete with native species for resources. Their numbers need to be culled periodically to keep them from taking over.

This is one of the extremely few things Trump did right.

Too bad we don't have that same energy about domestic cats, which cause many orders of magnitude more harm.

There are some federal lands the horses are on that can't be sold while there are still horses. Once the horses are gone the land can be transferred from public ownership to private ownership.

I'm having a really hard time with the current discourse around this - no, they're not. It is illegal to slaughter horses in the US and I'm skeptical of the veracity of the story going around. It sounds like some were accidentally sold to an international buyer that slaughtered, which is rough. That said, the BLM is in a really tough position with feral horses. They're an ecological nightmare: so high over carrying capacity in landscapes that can't support them that they're eating everything, including highly toxic inedible plants, and starving to death en masse. Most people I know who are actually involved with this issue are in support of everything the BLM does including roundups and sterilization; it's a bid to save both the horses and the environment. Many involved with this issue contend that they're just doing it to make room for cattle grazing which is a for profit use, but at least grazing is regulated and ranchers collab with the BLM to put a LOT of resources into land health projects and requirements. Anyway, It's all a trolley car problem, but way way way more complex and nuanced than "the govt is out to kill all the horses."

Maximum_Tree8170 • 7d ago

Kyle Kulinski did a video about that on Youtube. It's titled "Canada ERUPTS IN FURY As Trump Trade War BACKFIRES SPECTACULARLY!!" but he also addresses the issue of horses.
